FREQUENCY DISTRIBUTIONS OF PARTICIPATING FARMS

in

**1972 Feed Grain, Wheat,
and
Cotton Set-Aside Programs**

AN ANALYSIS

- ***By Size of Cropland***
- ***By Size of Allotment or Base***
- ***By Percent Allotment or Base is of Cropland***
- ***By Percent Planted is of Allotment or Base***

1972 Feed Grain, Wheat, and Cotton Set-aside Programs

Explanatory Note

THIS ANALYSIS IS DESIGNED TO PRESENT SOME IDEA IN TOTAL AND BY COMMODITY, OF FARM PARTICIPATION IN FEED GRAIN, WHEAT, AND COTTON PROGRAMS IN DETAIL BY (1) SIZE OF CROPLAND, (2) SIZE OF ALLOTMENT OR BASE, (3) SIZE OF BASE, AND (4) PERCENT ALLOTMENT OR BASE IS OF CROPLAND. THE NUMBER OF FREQUENCY RANGES VARY BY COMMODITY.

Small differences in this publication and corresponding data in the annual program report are due to rounding of the figures.

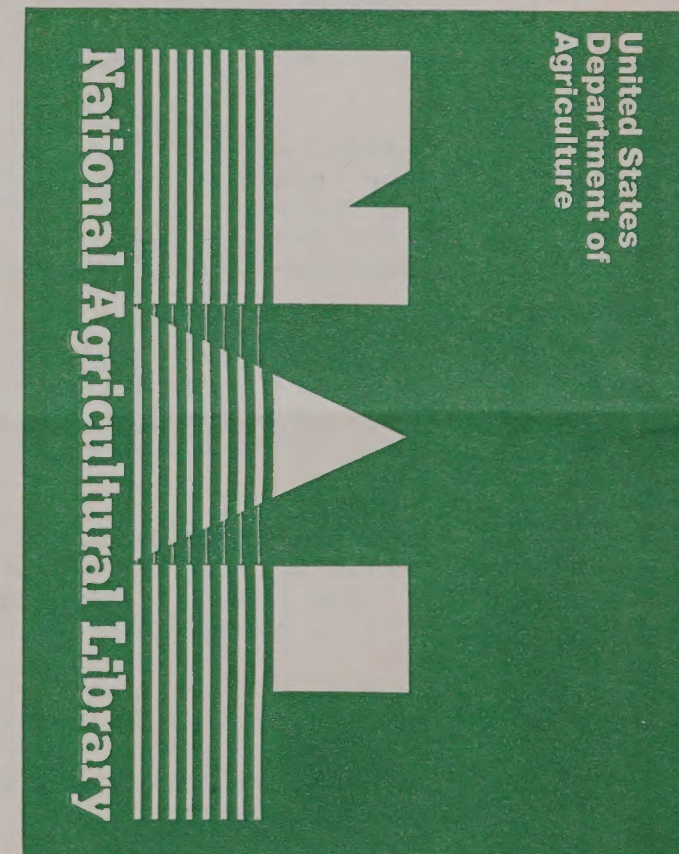

1. Frequency Distributions by Size of Base or Allotment in 11 and 12 ranges are by State for each of the programs. Feed Grain Program data are also shown separately for corn, grain sorghum, and barley. Within each frequency range are shown the participating farms with related bases, allotments or bases, set-aside acres, set-aside payments, payment rates per acre, and percent plantings are of bases. Set-aside acreage includes acres reduced by conservation limitation and summerfallow provision.
2. Frequency Distributions by Percent Planted is of Base or Allotment in 10 and 11 ranges are for National totals for Feed Grain, Wheat, and Cotton. Feed Grain Program data are also shown for corn, grain sorghum, and barley. Within each frequency range are shown participating farms with related bases or allotments, set-aside acres, acreage for payment, set-aside payment, and payment production.
3. Frequency Distributions by Size of Cropland in 20 ranges are for each State and for combined programs and separately for each of the three programs. Frequencies related to each with related cropland and conserving bases for the combined programs and for each commodity (corn, grain sorghum, barley, wheat, and cotton) are bases or allotments, planted acres, and production. Planted acres of nonconserving crops are also shown.
4. Frequency Distributions by Percent Total Bases or Allotments are of Cropland are for each State as a summary for the three programs. The same data are also shown separately for feed grain (corn, grain sorghum, and barley), wheat, and cotton. These frequencies have 11 ranges and show the number of farms with related cropland, conserving bases, allotments or bases, set-aside acres, and payment production.

In some instances the number of farms shown will have no corresponding figures in the base acreage because the acreage is less than 500 acres.
